# KNX TRUSS DOLLY-STACKER

CS-E0001-RevD-12.02.13

Patent Pending

## Stackable Truss Dollies from ESP.

### A NEW SPIN ON THE TRUSS DOLLY

KNX Truss Dolly-Stackers make it easier and faster to load, unload, move, stack and store truss.

The **Stackable Design** features truss chord cutouts on the top and bottom of the dolly so the KNX Dolly can be left in place when stacked in the truck, on-site or at the warehouse.

When loading/unloading the truck, KNX Dollies remain attached to the stacks—just pick the stack off the truck, set it down and roll it away.

### BUILT FOR HEAVY PAYLOADS

Each pair of KNX Truss Dolly-Stackers can be loaded with up to 1,400 lbs. of truss (on standard casters). KNX Dolly-Stackers are also available with Heavy-Duty casters to carry 4,600 lbs. per pair of dollies.

The high-quality 5" casters glide over smooth surfaces, helping you move a load of truss with less effort.

The **Dolly Shoes** accessory allows you to leave the KNX Dolly-Stackers attached while your truss is strapped down to a flatbed truck.

### BUILT-IN SAFETY, STABILITY AND CONVENIENCE

The integrated **Chord Claw** is easy to operate and secures the dolly in position while truss is being loaded. The KNX Dolly will not tip over.

The edges and all contact surfaces of the KNX Dolly, including the built-in carry handles, are padded with heavy-duty rubber gasket.

Available in many common sizes and custom sizes. Sold in pairs. Available in Yellow Powder-Coat or Chromate finishes.

## KNX STACKABLE TRUSS DOLLIES

- » Integrated **Chord Claw** keeps the dolly from tipping over before strapping the load to the dolly
- » Built-in carry handles and nesting design
- » Compact profile—the KNX Dolly fits completely inside the perimeter of the truss pack and the vertical profile keeps the stack low
- » High-Quality 5" Casters are standard

## OPTIONS

### Available Sizes:

Configurations available for all standard-size truss including 3-12", 4-12", 3-16", 2-20.5" and 2-24". Custom sizes also available.

### Available Finishes:

Powder-Coat Yellow or Zinc Chromate

### Choice of Casters:

- Std. High-Quality 5" Casters (1,400-lb. cap.)
- Heavy Duty Casters available (4,600-lb. cap.)

### Available Accessories:

Available Dolly Shoes support the KNX Dollies when your truss load is strapped down to a flatbed truck.
